

Tanium

Tanium

Available to purchase until 25/05/2028

Tanium defends every team, endpoint and workflow against the largest attack surface in history by delivering the industry's first convergence of IT management and security operations with a single platform under a new category, Converged Endpoint Management (XEM).

Key Facts

Benefits

- Unique academic unlimited site licence
- Simplified product bundle
- Simple preferential pricing model based on Jisc HE Banding
- Choice of two or three-year licence with annual or upfront payments
- Additional modules can be added at any time

Important dates

Agreement start: 26 May 2025

Agreement end: 25 May 2028

Invoice date: If an institution opts for annual payments, invoices will be issued three months in advance of the licence anniversary date.

Commitment Period

Institutions may participate in the Agreement at any time during the agreement period, and are bound by its Terms and Conditions, including payments, until the end of the Licence Period.

Licence type

Site Licence.

Trial

Contact [Chest Help](#) for more information.

Eligible Institutions

Higher and Further Education and Research Councils in the United Kingdom, and to Universities and Colleges of Further Education in Ireland.

Other organisations (including Further Education / Research Councils / Colleges) aligned with Jisc's charitable objectives of supporting education, research bodies and the public sector may ask to participate in the Agreement. Jisc will liaise with the Supplier about any such requests.

Background Information

This is the second term for the Tanium Chest Agreement. Universities have been very positive in their feedback about this Agreement, not available to commercial customers and offering significantly discounted pricing.

Product Information

Supplier Details

Licensor: Tanium UK Limited, a UK corporation with company number 09335968, having its principal place of business at 2nd Floor South 100 Brook Drive, Green Park, Reading, Berkshire, England, RG2 6UJ.

Product Description

The Tanium Chest Agreement is made up of the following:

- **A base bundle, available on Tanium Cloud, comprised of:**
 - Tanium Core - The Core Platform, including hosting and support
 - **Tanium Discover** - For finding all IP connected devices across your environment
 - **Tanium Asset** - For collecting all asset data to build a mini CMBD
 - **Tanium Comply** - For vulnerability scanning and compliance
 - **Tanium Patch** - For patching multiple operating systems
 - **Tanium Deploy** - For software deployment and automated 3rd party application updates
 - **Tanium Impact** - For understanding possible lateral movement opportunities for a hacker
- **A range of additional modules that can be purchased any time during a contract:**
 - Deployment Service*
 - **Reveal**
 - **Enforce**
 - **Performance**
 - **Integrity Monitor**
 - **Investigate**
 - **Engage**
 - **Benchmark**
 - **Threat Response**
 - **Certificate Manager**
 - **Provision**
 - **SBOM**
- **Training and Exams**
 - A range of 35 different training courses and exams
- **Enterprise Services**
 - Purchase additional hands-on support from Tanium by day or by week

Deployment Service is a mandatory purchase for all new customers

With the exception of Deployment Service (see above) all modules can be added at any time. Payment will be pro-rated for additional modules, although the minimum term will be 6 months.

Please see below for descriptions of these products

Tanium Base Bundle (referred to as “Tanium Base”).

Tanium base is designed on the needs of organisations in the sector.

Through Tanium's patented linear chain architecture, organisations are able to discover and understand all IP connected devices, whether

on campus, or at home.

Devices can then be brought together to create a better understanding of the entire environment. Software installed is then clear with detailed usage. All vulnerabilities across the estate can then be realised, giving a clear and rapid review of the threat landscape.

Operating systems can be patched and 3rd party applications can be updated (in an automated manner_ using the same agent, in the same console, in the cloud with zero infrastructure.

Plain language answers from plain language questions makes this management and understanding of machines fast and easy. Tanium gives real time, trusted data to all staff across all IT teams to make corrective decisions as a group.

APIs can be used to integrate with third-party and in-house solutions such as ITSM products.

Tanium Reveal Module. Tanium Reveal helps to enable organizations to detect sensitive data at rest on endpoints.

Tanium Enforce. Tanium Enforce enables unified endpoint management and security by providing centralized policy management across operating system, application, and security for Windows and macOS environments that are on-premise, remote, or cloud-based.

Tanium Performance Module. Tanium Performance helps to enable organizations to efficiently monitor, investigate, and remediate endpoint performance issues at scale.

Tanium Integrity Monitor Module. Tanium Integrity Monitor helps to enable organizations to continuously monitor critical operating system, application, and log files at scale, while providing the ability to link file integrity monitoring with active alert investigation, configuration compliance, vulnerability scanning, and other aspects of endpoint management and security.

Tanium Investigate

Tanium Engage

Tanium Benchmark. Tanium Benchmark provides industry comparisons for common enterprise risk, security, and operations metrics. Security continues to be a board-level issue, and Benchmark gives teams the context necessary to highlight areas of good performance and show opportunities for investment. Metrics are updated daily to ensure that both your progress and the industry benchmark are based on the most up-to-date data.

- <https://community.tanium.com/s/article/Introducing-Tanium-Benchmark>
- <https://www.tanium.com/products/tanium-benchmark/>

Tanium Threat Response Module. Tanium Threat Response helps to enable organizations to detect, investigate, and respond to threats and compromise with speed and scalability.

Tanium Certificate Manager. With Tanium Certificate Manager, you can gain complete visibility into the digital certificates across your Windows, macOS, and Linux endpoints. With weak encryption and expired certificates, endpoint communications are at risk of interception critical business service outages. You can use Certificate Manager to find and alert on expired or expiring certificates and for visibility into certificate encryption strength.

Certificate Manager provides dashboards, reports, sensors, and packages that you can use to:

- Find expired or expiring certificates
- Identify weak cryptographic algorithms and key lengths
- View self-signed and unauthorized CA certificates
- Inventory TLS ciphers for listening services
- Send reports with certificate details using Tanium™ Connect

<https://www.tanium.com/products/tanium-certificate-manager/>

Tanium Provision. Provision provides bare-metal provisioning of Microsoft Windows or Linux to on-premises and internet-connected devices. It also enables re-imaging outdated or broken devices.

<https://docs.tanium.com/provision/provision/overview.html>

Tanium SBOM. Tanium SBOM allows you to know all your software supply chain vulnerabilities in seconds

Cyber Essentials Video

Click on the below image to view Tanium's Cyber Essentials video from January 2023, uploaded to Chest's YouTube page. It's only two minutes long, a nice succinct summary of how Tanium can help.

How Canterbury Christ Church University Improved Visibility into Endpoint Vulnerabilities

Canterbury Christ Church University improved its security posture and staff efficiency by using Tanium's platform using real-time visibility, automation, compliance and reduced vulnerabilities. Read more [here](#) on the valuable findings and solutions Tanium provided for Canterbury Christ Church.

How Tanium helped the University of Salford gain visibility of assets and combat cybercrime.

When Covid-19 struck, the University of Salford knew they were facing serious risks and threats of cybercrime due to the sudden switch to remote working and learning.

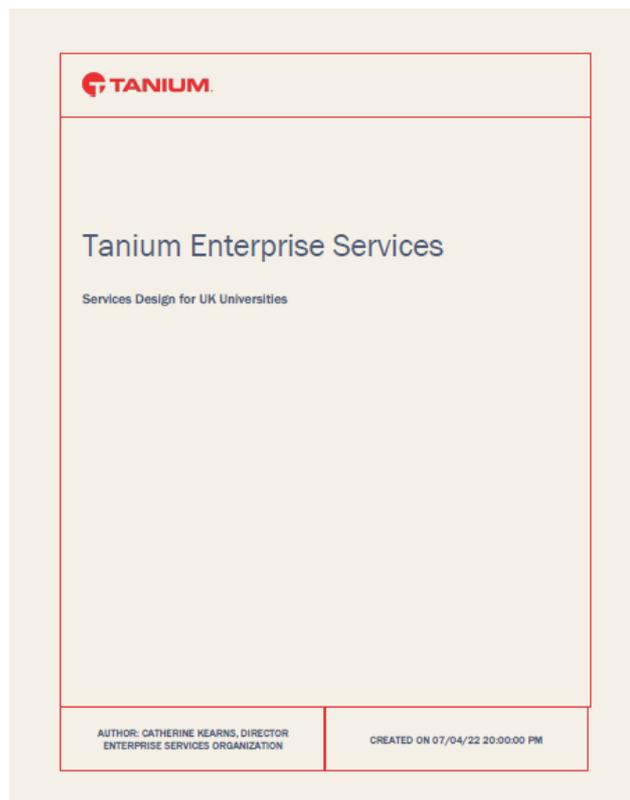

To combat this, Salford used the Tanium platform to get a comprehensive visibility of assets. This revealed hundreds of shadow IT endpoints, identified thousands of missing critical patches and vulnerabilities while also establishing real-time visibility into its 5,000 on-premises, remote, and cloud-based assets. Click [here](#) to read more on the valuable findings and solutions Tanium provided for the University of Salford.

Technical Support

Institutions in Jisc band 1 are provided with a Tanium support resource which may comprise engineers/TAMs (dependent upon the nature of the customer request) who can:

- Provide advice on Licensed Software/Service roll-out/implementation.
- Define an upgrade path based on business need
- Liaise with the End User with respect to Licensed Software/Service issues and resolution.
- **Support Center Handbook**
- For more information contact kirk.bellerby@tanium.com

System releases, new versions and functionality

Details of system releases and/or new versions and/or new supporting documentation will be notified.

Terms and Conditions

Licensor: Tanium UK Limited, a UK corporation with company number 09335968, having its principal place of business at 2nd Floor South 100 Brook Drive, Green Park, Reading, Berkshire, England, RG2 6UJ.

The Chest Order, together with the Licence Terms and Conditions, and any exceptions listed below, create a legally binding contract between your institution, organisation or company and the Licensor. Therefore please read the terms and conditions carefully and only submit a Chest Order if its terms and conditions are acceptable to your institution, organisation or company and you have the authority to make the financial commitment shown.

Licence Type

This Site licence is subject to the terms and conditions for the [Standard Chest Licence for Software \(June 2011\)](#). Exceptions to these terms are shown at the bottom of the page.

Payment Terms

On receipt of a completed Order, Institutions will either:

1. be invoiced for the whole two or three year licence fee immediately if they have opted for the 'pay in full' option
2. be invoiced for the first year fee immediately if they have opted for annual payments, with invoices for years two (and three) to follow approximately three months prior to the licence anniversary date. Please be aware, this may lead to two invoices having to be paid within one 12-month period.

Please note, upon receipt of an initial order, Tanium can issue the institution with a temporary licence key if required, and commence the service/deployment elements. This is because permanent licence keys will only be released once payment is received. As such, we would ask sites to pay their invoice as promptly as possible, thereby allowing time for money to pass from Institution to Jisc to Tanium. If your institution insists on a PO number being quoted on the invoice, please ensure you provide this at time of ordering.

Chest is an Enterprise of Jisc. All Purchase orders must be made out to Jisc Services Ltd, 4 Portwall Lane, Bristol, BS1 6NB to cover all charges plus VAT.

All terms contained in a PO are expressly rejected and do not form part of the Licence or vary the Licence terms in any way.

Payments are due within thirty days of invoice date; recipients of late payments are entitled to interest in accordance with **UK statutory provisions**.

Termination Clauses

At the end of a Licence period sites will be required to delete the software from their systems.

It is the intention of Chest and Snow Software to renew this three year Agreement. If the Agreement is renewed or extended then new conditions may apply. If the Agreement is not renewed then any extension is a matter between institutions and Snow Software.

Location and Use Permissions

The product(s) may be used by any Authorised User of the Licensee for Educational Purposes which includes the administration and management of the licensee's educational and research operations. These permissions are described in the terms and conditions for the Standard Chest Licence for Software.

Personal Licences

N/A

Exceptions to the Terms and Conditions

Support services. This additional definition features in the contract.

- The term "**Support**" means, collectively, the support and maintenance services, the Supplemental Support (if applicable), training and any other services acquired by Licensee from Licensor, all of which are provided in accordance with, and governed by, the terms and conditions of the Licence Agreement/Services Agreement as applicable. The type, term, and level of Support are as set forth in the Order. If Licensee has a current Support Services entitlement or Subscription License (that includes Support Services) governed by the Licence Agreement/Services Agreement, then Licensor will provide Licensee with the support and maintenance services described in Section 3 (the "**Support Services**").

Once the relevant Support Services entitlement or Subscription License/Service Period has expired, Licensee has no further right to receive any Support Services. Unless otherwise set forth in the Order, the term of Support Services is coterminous with the Licensed Term/Service Period (the "**Support Term**"). All Support is provided in accordance with, and governed by, the terms and conditions of the Licence Agreement/Services Agreement. Geographic limitations may apply. Unless otherwise agreed upon in writing by the parties, the Support will be provided in English only.

- *Support Services.* Unless otherwise set forth in the Order, Licensor will provide the following Support Services to Licensee.
 - **General.** During the Support Term/Service Period, Licensor shall provide Licensee with reasonable support for the person(s) designated by Licensee that may contact Licensor for Support Services ("**Technical Support Contact(s)**"). Licensee may contact Licensor for Support Services Monday to Friday, 8m. to 6 p.m. Central European Time, excluding Licensor holidays. Licensor shall use good faith efforts to work with Licensee during Licensee's normal business hours in the time zone in which the Licensee is located to resolve any issues raised by Licensee. Licensee may designate up to a maximum of two (2) Technical Support Contacts.
 - **Contacting Licensor.** Licensee may contact Licensor for Support Services by submitting a request via the internet-based support and maintenance platform for which Licensee will register and use to submit Support Requests and access Documentation during the Licensed Term or Support Term, as applicable, (the "**Licensor Support Portal**").
 - **Licensee's Obligations.** All Licensee requests made to Licensor for Support Services in accordance with Section 6.2 ("**Support Requests**") shall be submitted by Licensee to Licensor through Licensee's Technical Support Contact(s). Licensee may change its designation of Technical Support Contact(s) upon written notice to Licensor.

Licensee is responsible for: (1) preparing and maintaining their systems (e.g., multi-factor authentication) and facilities in accordance with the Documentation and specifications of the appropriate suppliers; (2) securing all required permits, inspections, and licenses necessary to use the Software and Support Services; and (3) complying with all applicable laws while using the Software/Services and Support Services.

Licensee shall be solely responsible for maintaining all necessary backup and recovery procedures to prevent loss of its data. Licensee acknowledges and agrees that Licensee is solely responsible for the function, performance, and results achieved in using or accessing the Support Materials that Licensor may make available to Licensee in connection with the Support Services.

- **Third-Party Support.** Notwithstanding anything else to the contrary in this Licence Agreement, if Licensee enters into an agreement with the Reseller under which the Reseller will provide any support to Licensee for the Licensed Software/Service ("**Third-Party Support**"), Licensee must contact the Reseller, and not Licensor, for support. Licensee acknowledges that (i) all terms and conditions related to Third-Party Support are solely subject to the agreement between Licensee and the Reseller; and (ii) Licensor has no responsibility or liability for Third-Party Support.
- *Supplemental Support and Training.* Supplemental Support may be purchased by Licensee and provided in accordance with Section 3.5. Product training may be purchased by Licensee and provided by Licensor with respect to the Licensed Software ("**Training**").
- *Personal Data and Systems Information.*
 - **Personal Data.** Licensee, rather than Licensor, determines which types of data, including Personal Data (as defined in the Data Processing Addendum), exists within its endpoint environment, and determines to what extent Personal Data is processed through its use of the Software/Service and Support. To the extent that Licensor processes Personal Data on behalf of Licensee while providing the

Licensed Software/Service and Support, Licensor will process such Personal Data pursuant to the Data Processing Addendum found at Exhibit A to the Licence Agreement/Services Agreement.

- **Systems Information.** During the term of the Licence Agreement, Licensee may provide to Licensor and the Licensed Software/Service and Support may collect performance, usage, and analytics information relating to Licensee's operation and use of the Software/Service and Support, metadata relating to Licensee's networks, software, applications, and systems, device identifiers, network telemetry, endpoint telemetry, system configuration, and data generated through any of the foregoing (collectively, "**Systems Information**"). Because Licensee's endpoint environment is unique in configurations and naming conventions, the Systems Information could potentially include Personal Data. Licensee may redact, edit, or otherwise suppress any Systems Information, including Personal Data, prior to providing to Licensor for processing. To the extent any Systems Information includes Personal Data, Licensee represents and warrants that it has made all necessary disclosures and has a lawful basis to share the Personal Data with Licensor for the Permitted Purpose.

Licensee agrees that Licensor may use Systems Information: (a) to provide the Software/Service and Support; (b) to research, develop, and improve Licensor's products and services; (c) as directed or instructed by Licensee; and (d) on an aggregated and/or anonymized basis, for marketing purposes (the "**Permitted Purpose**"). To the extent Systems Information identifies Licensee, such Systems Information will be treated as Confidential Information.

- As between Licensee and Licensor, this section states Licensor's entire obligation with respect to Personal Data.

- **Supplemental**

- Licensor Supplemental Support ("**Supplemental Support**") may be obtained from Licensor at its then-current list price or mutually negotiated price during the Licensed Term, and the length of the engagement will be specified in the Agreement or Order ("**ESR Support Term**"). If Licensee purchases Supplemental Support, Licensor will provide a Licensor enterprise support resource ("**ESR**") who will be available to provide the relevant level of Supplemental Support during the ESR Support Term, which may consist of reasonable remote and onsite support.

The ESR may provide the following support as agreed with Licensee:

- assist with the deployment, configuration, and optimization of the Licensor products;
- plan, coordinate and implement Licensor-related projects and communicate updates;
- provide consolidated reporting of current deployment status to Licensor's senior technical and sales leadership and designated Licensee representatives;
- collate technical documentation on behalf of the Licensee;
- help plan, communicate, and monitor the status, health and challenges associated with installation and deployment of Licensor products;
- maintain ongoing technical relationships with Licensee and provide weekly reporting to Licensor's senior technical and sales leadership and designated Licensee representatives;
- track all tickets, bugs, feature requests, improvement requests and ongoing communications regarding Licensor products; and
- observe ongoing operations for potential problems and improvements; such observations will be brought to the attention of Licensor's senior technical and sales leadership and designated Licensee representatives.

The ESR will not:

- execute an action, including, but not limited to deploying a patch, using Licensor products without the advance written review and approval by a designated Licensee representative;
- use Licensor products to perform any incident response services;
- use any destructive content (e.g., file delete action) on behalf of the Licensee;
- act in a capacity to directly support third-party hardware or software on which the Licensor product is running or dependent; or
- change any settings, undertake Licensor server or client tuning or conduct advanced troubleshooting without direct instruction and prior authorization from the Action Approver (or other designated Licensee representative) and from the assigned primary Licensor technical account managers working with Licensee ("**TAM**").

The ESR Support Term will commence on the date set forth in the Schedule, or the effective date of the Schedule if a start date is not otherwise indicated. Licensee will provide the ESR access to the Licensor environment and related Licensee's systems within thirty (30) days from agreed upon on-boarding date ("**On-Boarding Period**"). In the event Licensee fails to provide the ESR with the required systems access noted above, Licensor may withdraw the assigned ESR until access is granted. Supplemental Support will be provided during normal business hours or as mutually agreed upon between Licensor and Licensee. The ESR may be required to be out-of-the-office due to PTO, illness, holidays, training, vacations, or meetings. During this time out-of-the-office, or should the ESR's employment with Licensor end, Licensor will provide to Licensee with standard Support Services, unless otherwise agreed by Licensor, or when a replacement ESR is available, through the ESR Support Term.

- *Licensee Responsibilities.* Licensee and its personnel shall cooperate fully with Licensor and its personnel in all respects, including, without

limitation, providing information as to Licensee requirements, providing access to the equipment/hardware on which the components of the Licensor products are or will be installed, and providing access to all necessary information regarding Licensee's systems. Licensee shall be responsible for making, at its own expense, any changes or additions to Licensee's current systems, software, and hardware that may be required to support operation of the Licensor products.

- *Action Approver.* Licensee will assign an action reviewer/approver to act as the final Licensee approver for all Licensor actions submitted by the ESR ("Action Approver"). The Action Approver will have the authority to approve all actions issued in the Licensor console. Any other requested changes to the Licensee's environment will require a change review process to be agreed by the parties.
- *Remote Support.* Supplemental Support may be provided remotely via telephone or electronic communications. Licensee agrees that Licensor resources may access Licensee's systems during the relevant ESR Support Term, using a defined standard virtual private network (VPN). If a network connection between Licensor and Licensee's systems is required for Licensor to perform the Supplemental Support, Licensee will provide such access as follows:
 - Licensee is responsible for ensuring that (i) its network and systems comply with specifications provided by Licensor; (ii) all components of Licensee's Tanium environment are accessible through the VPN; and (iii) the VPN is installed in a timely manner for Licensor to perform the Supplement Support or other Support Services.
 - Licensee is responsible for acquiring and maintaining any equipment and performing any activities necessary to set-up and maintain network connectivity at and to Licensee's Licensor environment.
 - Licensee will provide and maintain user accounts for, and access to, the VPN for the Licensor resources, including, but not limited to, Licensor's onsite and remote resources.
 - Licensor is not responsible for network connection issues, problems or conditions arising from or related to network connections, such as bandwidth issues, excessive latency, network outages, and/or any other conditions that are caused by an internet service provider, or the network connection. If Licensee's VPN client software and/or VPN infrastructure fails to allow Licensor access to perform its obligations, Licensee agrees to pay for any increased costs resulting from such failure.

Notwithstanding anything to the contrary in the License agreement, the Licensee may allow the following Authorised Users to use the Software/Service: Licensee's personnel; Personnel of Licensee's Affiliate (where "Affiliate" means an entity that is controlled by, controls, or is under common control of a party, where "control" means the ownership, in the case of a corporation, of more than fifty percent (50%) of the voting securities in such corporation or, in the case of any other entity, the ownership of a majority of the beneficial or voting interest of such entity); or a third party appointed by Licensee who manages the Software/Service and related support materials on the Licensees Managed OS Instances. Home Use by students is not permitted.

All other exceptions are per the following documents:

Schedule 4 – Part A: Standard Chest Software Licence (as Amended for this Agreement)

Schedule 4 – Part B: License Terms for Tanium Cloud/Tanium-as-a-Service
